

Country of Origin: India

## DESCRIPTION

The CLYMA YOYO is a fall arrest block designed to prevent workers from falling when working at heights. It features a high-impact polymer casing and a galvanized steel wire rope available in lengths ranging from 5 to 20 meters. For added safety and functionality, the device includes a 360° swivel anchorage eye and a swivel steel snap hook equipped with a load indicator

## OPTIONS

Length

04-20 mtr

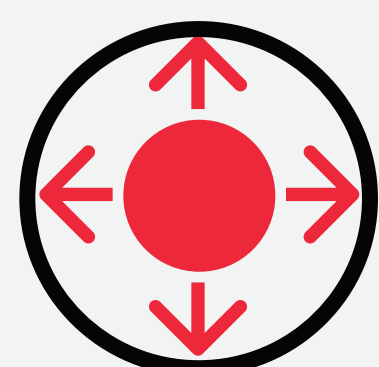

## SAFETY STANDARDS

EN 360:2002

## SPECIFICATIONS

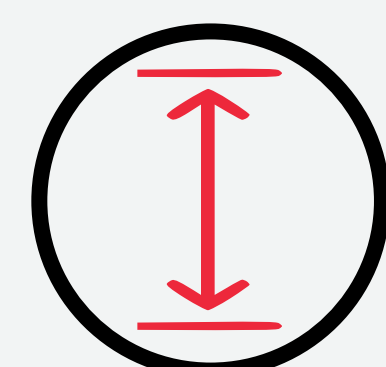

Load Capacity - 100 kg  
Weight - 7 kg

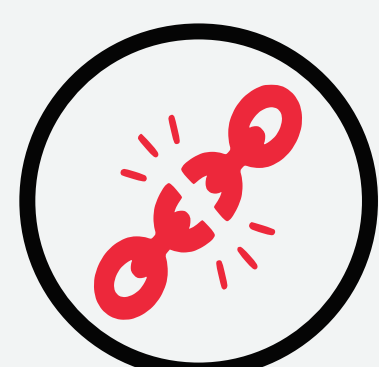

Static Strength  
22 kN

Dynamic Performance  
100 kg free fall from 2 mtr

Height - 223 mm  
Width - 207 mm with handle

Breaking Strength  
12 kN

## FEATURES

- ✓ Dual Functionality: Engineered to arrest falls from height
- ✓ High-Durability Casing: Built with high-impact polymer for long-term component protection
- ✓ Flexible Material Options: Equipped with 4.0–4.5 mm galvanized steel wire rope, with a stainless steel alternative available.
- ✓ 360° Maneuverability: Features an aluminum alloy anchorage eye with full rotation to prevent rope twisting.
- ✓ Integrated Safety Indicator: Includes a swivel steel snap hook with a built-in load indicator to identify if the unit has been deployed
- ✓ Galvanized wire rope and option of stainless steel rope also available
